

MVP Development Workflow (Claude-Friendly)

Phase 0: Idea

Create a product brief with the problem, users, hypothesis, and success metric.

Phase 1: Product Thinking

Freeze the vision, personas, and problem space.

Phase 2: User Flows

Map complete user journeys before designing UI.

Phase 3: Information Architecture

Define pages, navigation, and hierarchy.

Phase 4: Screen Design

Design one screen at a time. Keep one Claude conversation per screen.

Phase 5: Clickable Prototype

Connect approved screens into a complete prototype.

Phase 6: Solution PRD

Write feature requirements, user stories, interactions, acceptance criteria, and out-of-scope.

Phase 7: Technical Design

Define architecture, database, APIs, folder structure, and implementation plan.

Phase 8: Build

Implement one feature at a time with Claude Code.

Phase 9: QA

Test happy paths, edge cases, responsiveness, accessibility, and performance.

Suggested Docs

CLAUDE.md, product-brief.md, vision.md, problem-space.md, personas.md, user-flows.md, information-architecture.md, screens/, solution-prd.md, architecture.md, database.md, api.md

Token Saving Tips

Freeze early docs, reuse them, keep one chat per feature, and only load the documents needed for the current task.
